## ABOUT US

Innofixx is a company established in the Metal Machining sector in 2014. Since its inception, Innofixx has primarily focused on European markets, aiming to establish a lasting presence in the industry. Our main objective is to direct the entire production towards European markets, aiming to achieve a strong position in this market. In line with this goal, we design our organizational structure to focus on Europe and manage our plans and projects in accordance with this strategy.

## Why Innofixx

We provide high-quality solutions in various fields, offering tailored solutions to meet your needs with innovative designs, strong performance, and unique features.

As an industry leader, Innofixx aims to maximize customer satisfaction by combining technology and design. Our product range includes a variety of high-quality products that can meet all kinds of demands.

Visit our Innofixx page to explore our durable and aesthetic products that keep up with the latest trends in the industry. Enjoy the efficiency of your business with solutions designed to meet your needs.

Discover the solutions of the future with Innofixx today!

## Our Strong Presence in Europe

In 2017, Innofixx opened an office in the capital of Germany, Berlin, with the aim of enhancing its presence in Europe and effectively meeting the demands of the region. This step represents a strategic move to strengthen the company's permanence in the European market. In 2019, we further solidified our presence in Germany by establishing our manufacturing facility, Innofixx Fertigungstechnik GmbH, equipped with 12 CNC lathes and milling machines. This production center in the heart of Europe enabled us to commence manufacturing operations in the region.

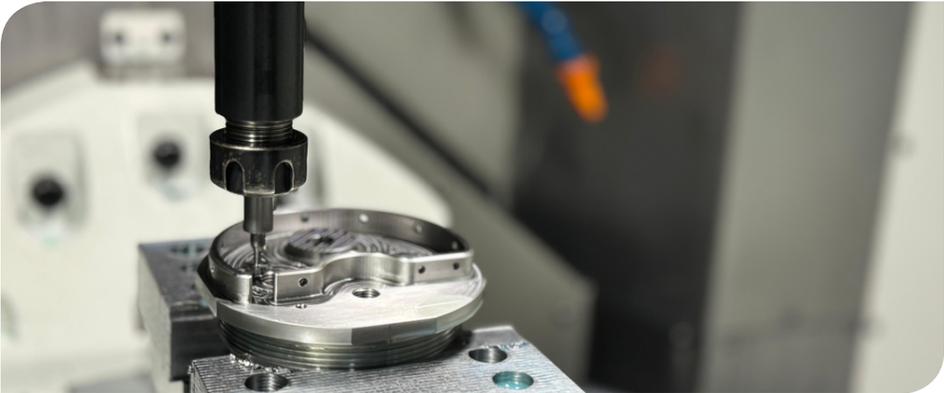

## International Competitiveness and Sectoral Contribution

Innofixx enhances its international competitiveness by directing a significant portion of its production in Turkey towards spare parts manufacturing for European countries. This strategy aims to provide quick and effective services to customers in Europe. Additionally, as Innofixx Turkey, we make significant contributions to the development of our country through services tailored to the Drilling, Transportation, and Mining sectors.

## Manufacturing

INNOFIXX is an international company that operates under the name INNOFIXX Fertigungstechnik GmbH in Berlin, Germany. Utilizing modern facilities and control units, we produce according to customer demands. Within the scope of mass production, our company achieves an annual production of more than 2 million units solely in Turkey.

## Processing

Prioritizing customer satisfaction, we carefully manage our processing procedures to meet demands in the best possible way. Our machines are efficiently operated by competent staff to process products with high precision and quality.

## Manufacturing Process

Our production process is centered around our mission to provide top-tier solutions to our customers without compromising on quality. Integrated with modern technology and our expert team, our production lines exceed industry standards in performance.

Adhering to principles of quality control and continuous improvement at every stage of our products, we strive to maximize customer satisfaction. Shaped by principles of innovation, efficiency, and environmental sustainability, our production process allows us to secure a leading and reliable position in the industry.

We take pride in meticulously addressing every detail in the production process, aiming to deliver reliable, durable, and high-performance products to our customers. Our quality standards in the production process aim to surpass the expectations of our business partners and customers.

Explore our production process filled with custom solutions tailored to your needs and experience the pursuit of excellence in quality.

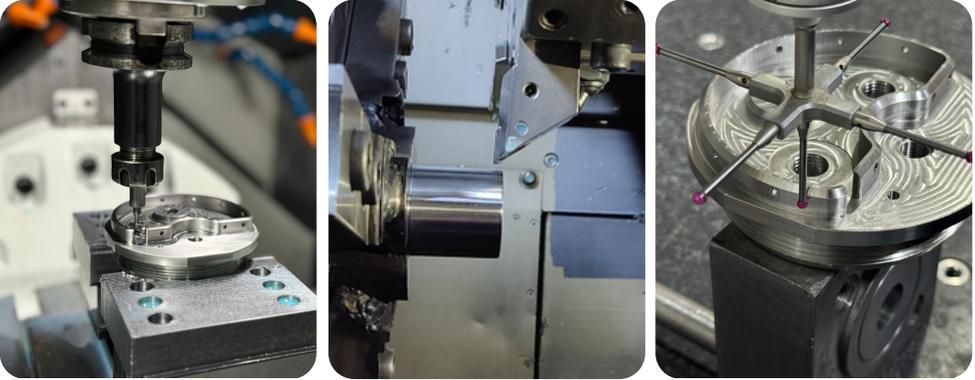

## Precision in Our Machining Process

We ensure the highest precision at every stage of our machining process to meet customer demands. Our modern and state-of-the-art machines, meticulously operated by our skilled personnel, produce products of quality that exceed customer expectations. Our machining process is continuously reviewed and improved to maximize customer satisfaction and product quality.

## Areas of Expertise

Innofixx strengthens its expertise in specific areas within the industry through accumulated knowledge and experience. With years of expertise and a qualified team, we are here to provide our customers with the best solutions.

Our teams, equipped with advanced technological solutions, are the key factor that allows us to be pioneers in our areas of expertise. Innofixx, with its customer-centric approach, generates solutions tailored to your needs in each expertise area.

Our areas of expertise include **CMM**, **Milling**, and **CNC Turning**. The knowledge and experience we possess in these areas enable the successful completion of your projects.

Discover our expertise to provide the most suitable solutions for you, and feel confident that we are here to support you with your choices.

## Competent Personnel and Technology

The elements that strengthen our services in the metal machining field are our experienced and expert personnel along with our state-of-the-art machines. Our competence in understanding customer demands and providing the best solutions is continuously supported through ongoing training.

## Flexible Production Capacity

Thanks to our modern machines and flexible production processes, we have the capability to provide custom solutions to our customers. To quickly adapt to changing demands, we offer 24/7 service with our shift system.

## Quality and Precision Standards

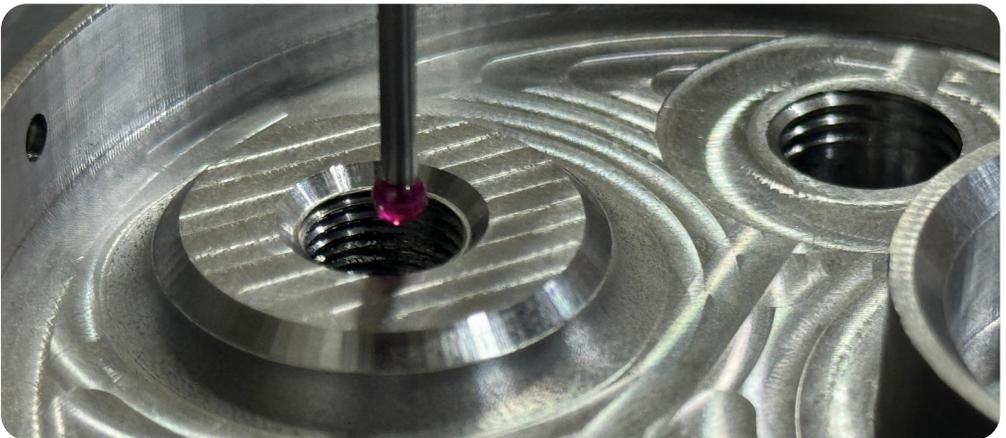

Our company prioritizes quality and precision in machining activities. The meticulous implementation of quality control processes at every stage plays a key role in delivering excellent results to our customers.

## Quality Control

Quality control is a top priority for INNOFIXX. Our company has embraced a philosophy of conducting business based on quality and operates accordingly. Equipped with technological innovations such as 3D CMM measurement devices, we can carry out our work with extreme precision and accuracy. This enables us to provide our customers with high-quality products and ensures meticulous attention to detail for seamless deliveries.

Customer satisfaction is at the core of our business processes. At every step, we strive to understand our customers' needs and make efforts to meet their expectations. In this regard, maintaining the quality of our products and working towards continuous improvement is a fundamental element to gain the trust of our customers. At INNOFIXX, we always focus on delivering the highest quality products and services to ensure customer satisfaction.

## Transportation and Shipping Solutions

Our company collaborates with expert teams to ensure the safe and timely delivery of our products, aiming to provide the best service to our customers. Through advanced logistics planning and cooperation, we seamlessly deliver our products worldwide in accordance with the needs of our customers.
